### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with attorney Peter Aufrichtig on July 23, 2009.

3. The application has been amended as follows:

On page 11 between line 7 and line 8, the following sentence has been inserted:

--Fig. 10 is a block diagram showing a series of paired basis swaps with correlations to each other.--

### ***Allowable Subject Matter***

4. Claims 1-69 are pending and allowed.

5. The following is an examiner's statement of reasons for allowance:

The closest prior art of Kochansky (US 2003/0144940 A1) teaches managing collateral proffered in support of transactions involving financial instruments, wherein the collateral management is conducted in an integrated setting with other systems providing analytical and trading capabilities. The system is configured to execute a method which includes receiving terms of an agreement relating to collateral support for a transaction, storing the terms of the agreement as data in an agreement database,

Art Unit: 3694

computing an exposure value representing the risk of financial loss associated with the transaction, comparing the computed exposure value with the threshold exposure value and initiating a transfer of collateral based on the comparison of the computed value with the threshold exposure value.

In regarding to independent claim 1, Kochansky taken either individually or in combination with other prior art of record fails to teach or render obvious a credit risk mitigation system for swap transaction between counterparties, comprising: a system counterparty, which forms paired basis swaps with pairs of counterparties interested in forming a swap; the system counterparty making paired, balanced offsetting swaps with the individual members of a pair of counterparties interested in forming a swap and simultaneously creating a swaption with each of the pair of counterparties, the system counterparty including communication means coupled to the system counterparty for allowing the system counterparty to communicate with potential pairs of counterparties interested in forming a the swap to receive potential swap contract information and to communicate paired basis swap information to accepted pairs of counterparties and collateral requirements with each accepted swap between the system counterparty and the other counterparty to such swap; termination means coupled to the system counterparty for determining if a counterparty to an accepted swap is in default and if in default selecting an appropriate response.

In regarding to independent claims 2 and 3, Kochansky taken either individually or in combination with other prior art of record fails to teach or render obvious a method of risk mitigation and collateralization of a swap used to hedge a forward contract,

Art Unit: 3694

comprising: forming offsetting paired basis swaps with a central swap authority for each of the pairs of counterparties; evaluating an initial fixed value at risk for each counterparty to the swaps with the central swap authority; calculating an initial collateral requirement for each counterparty to a swap with the central swap authority based on an agreed upon termination payment; assuring that required collateral by each counterparty is in the central swap authority's possession each delivery day; transferring the payment under the forward contract from one counterparty's funds held by the central swap authority to the other counterparty's control for each day's notional delivery under the forward contract; determining a floating rate index contract price for a day; updating new collateral requirements based on the difference between the fixed rate contract price and the floating rate index contract price for the previous day; terminating the paired swap utilizing a termination device coupled to the central swap authority if one of the counterparties defaults in any of its obligations to make payments to the central swap authority.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
